World Children's University Kindergarten Design & Built Project

Introduction

Designed a school complies with all over standards, so we created a school over Worldwide standards.

We are glad to be able to add such a brick to pre-school education as Pediko family.

Working together with the World Children's University team was our biggest happiness!

This project gave chance for the dreams of our children.

Inspired the school with colorful designs.

Child and family focused theme school was created by "play in every where" mindset.

Design is established step by step with 3D visual drawings and manufacturing is made accordingly.

As a result we are proud in being at World Children's University Project.

Design & building happy environments.

To make life easier Pediko is here!
